## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

*Status of the Application*

Claims 1-16 are pending in the application.

Applicants amendment to the specification in Paper Nos. 2 and 6 and amendment to the claims in Paper No. 2 are acknowledged.

*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim(s) 1-7, drawn to a polynucleotides and a host cell comprising said polynucleotides, classified in class 435, subclass 252.32.
  - II. Claim(s) 8-14, drawn to methods for the production of amino acids, classified in class 435, subclass 106.
  - III. Claim(s) 15 and 16, drawn to methods of using polynucleotide sequences for hybridization probes, class 435, subclass 6.
3. The inventions are distinct, each from the other because:

The host cell Group I and the methods of Groups II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the host cell of Group I can be used for protein expression or plasmid propagation and amino acids can be chemically synthesized.

The methods of Groups II and III are independent as they comprise different steps and yield different results.

4. Because the inventions listed as Groups I-III are distinct for the reasons given above, have separate classifications and separate search is required for each of Groups I-III, restriction for examination purposes as indicated is proper. "For purposes of the initial requirement, a serious burden on the examiner may be *prima facie* shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search as defined in MPEP 808.02" (see MPEP 803). Each of the inventions listed as Groups I-III requires divergent literature (patent and non-patent) and sequence searches.

### *Conclusion*

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
